## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Detailed Action

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 12-14, 16, 17 rejected under 35 U.S.C. 102(b) as being anticipated by Fillion.

With respect to claims 1 and 12, Fillion (4,982,234) teaches a method for managing documents for printing in a document management system comprising: identifying pages (col. 9, lines 1-5) within a document with a naming convention ( sift icon, copy qualify icon, 1 sided icon ) and specifying exception parameters (special paper 636 and shift 628) for the identified papers. See also col. 10, lines 5-10 and col. 9, lines 50-55.

With respect to claim 2, See col. 10, lines 1-4 where the operator can change a different program scheme.

With respect to claim 3, see col. 9, lines 17-20 for entering a page number.

Art Unit: 2625

With respect to claim 4, Fillion teaches designating pages with numerals, according to col. 9, lines 18-20.

With respect to claims 5 and 16, Fillion teaches the page numerals and range indicators as set forth in col. 10, lines 7-16.

With respect to claims 6, 14 and 17, Fillion teaches even and odd designations as claimed, taught in col. 9, lines 45-55 regarding the front and back portions of the sheet.

With respect to claim 13, Fillion teaches an input window (document window 606)

2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7-11, 15 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fillion in view of the Well Known Prior Art MPEP 2144.03.

The limitations regarding the color profile, trapping parameters, black overprinting parameters and anti-aliasing parameters, are referred to in pages 9 and 10 of the written specification and are suggested that the specific processes are well known in the art, apart from the use with the present invention. The imposition template identifier seems to be suggested as occurring in the prior art as discussed in the middle of the first full para. Of page 10 of the specification as the "conventional approach".
